[removed.txt](#)

I am working on the well sampling scope of but am not familiar with the access agreement you are referring to. I had also asked for status on USGS loggers that are/were in the wells. Can you please provide?

I do not believe REI will be able to mobilize this week. We have had the cold and flu season hit the office hard. I am out today and hope to be back tomorrow.

Dave,

I have not received a Sampling Plan or equivalent Scope of Work nor the access agreement signed by Bill and Linda Kozak.

Dave,

You will need to send a Sampling Plan or equivalent Scope of Work for the Tribal Natural Resource Department to process approval. Also, the signed access agreement is required.

Kristen

Hello again. The weather next week looks favorable to complete the December well sampling event. REI would like to try to complete this work next Tuesday or Wednesday (December 20-21), if possible. Kristen, please notify me if this is acceptable as the initial notification regarding the December sampling intent was not issued until December 12th. Your 10 day notification requirement would not allow REI to sample before Thursday the 22nd. I have guys on vacation for the holidays starting on Thursday which would likely push sampling off until after the first of the year.

Kristen, please advise on status of USGS loggers in wells.

Thank you,

David N. Larsen P.G

Subject: Tower Standard - Lac du Flambeau

Hello, I have heard back from all regarding the cancellation of the proposed drilling event scheduled for this week, with the exception of Kristen.

REI is also trying to schedule another round of well sampling at the site. This sampling date will be heavily dependent on weather and I will provide as much advance notification as possible, but REI will be attempting to complete the work before the holidays.

Kristen, are there any loggers remaining in any of the wells that REI should be aware of? If so, please advise on location(s) and options to either manage the loggers or avoid sampling those well(s).

Thank you,

David N. Larsen P.G
